PROFILE

I am continuously developing my skills and growing professionally. I have a strong confidence in my ability to generate intriguing ideas in the field of web development and the creative realm. I have acquired proficiency in PHP, JavaScript, HTML, Java, CSS, Bootstrap, and MySQL. I have also completed several projects, including hospital and school management systems, as well as mobile applications using Java and MySQL.

EXPERIENCE

DEVELOPPEMENT WEB

- Create a web project for managing a hospital, setting up an online shop, building a portfolio, and managing school projects.
- Generate concepts based on clients' requirements, tailoring the project to their specific needs and preferences.
